

## A PRACTICAL KITCHEN HELP, WHICH ALSO LIKES IT HOT

Thermo offset spatula. length 31 cm: 9575

»» [Download image in high resolution](#)

GIESSER, one of the leading manufacturers of knives and accessories for professionals in the food processing and gastronomy industry, has developed this supremely practical kitchen implement.

The thermo plastic offset spatula is heat resistant to 240 °C. That means that fried or baked food can be removed from hot pans and baking trays with no difficulty without the plastic beginning to melt. Because of its slightly offset shape and flexible material, the spatula lies nicely in the hand. It is outstandingly suited to turning and removing any type of grilled or fried food. Also ideal for all coated pans.

The one-piece thermo offset spatula features a practical suspension eye for space-saving storage, is dishwasher proof and meets the requirements of the current food contact materials and articles regulation.
