INSPIRED BY NATURE.

ABSOLUTELY PERFECT.

PrimeLine

GIESSER
MADE IN GERMANY
PrimeLine features are inspired by nature, making this knife series particularly ergonomic, hygienic, sharp and slip-resistant. Various blade shapes and lengths, flexible or stiff blades, as well as the option of a shorter or longer handle guard make PrimeLine the perfect choice for all areas of food service, meat processing and food processing.
AMAZINGLY ERGONOMIC:

A soft, slip-proof surface surrounding a hard core guarantees stability and precise handling. Finely-tuned proportions make PrimeLine blades and handles perfectly balanced – for easy, fatigue-free cutting. The optimised, rounded handle with handle guard offers a secure grip that’s easy on your tendons and joints.
EXTRAORDINARILY SLIP-RESISTANT:
The ergonomic, soft handle coating moulds to fit your hand. A detailed surface structure makes for a secure grip and optimum handling – even when your hands are wet. The risk of slipping is significantly reduced, helping to prevent injuries.
PrimeLine knives are manufactured entirely from top-class materials processed with utmost care. The more even the hardening, the better the knife holds its edge – that’s why we use the latest high-tech vacuum tempering process. Precise grinding and hand-finishing ensure a long life span and extraordinary sharpness.
UNIQUELY CLEAN:

The antibacterial effect of silver has been valued for centuries. We’ve equipped our handles with Sanitized® Silver finish, permanently and reliably reducing the spread of bacteria and the risk of cross-contamination. Sanitized® Silver offers optimum hygiene for the meat and food processing industry, fully complying with the regulation (EU) 1935/2004. It’s also anti-allergic and dermatologically tested.
